

Everything goes in his mouth.

What's in your magnet?

Non-toxic. Everyday. You've seen the headlines about the recalls of Chinese-made products the unsafe levels of lead content. Does the flexible magnet you buy come from China? How sure are you that the products you are supplying to the marketplace are safe? We know that a flexible magnet from Magnum Magnetics is child-safe, and our magnet passes established toy safety standards for heavy metals content. All of our magnetic material is produced and tested in the United States. So what's in your magnet? Make sure your products are safe, ask for Magnum Magnetics.
